After publication of the paper "Melatonin-Induced PGC-1 α Improves Angiogenic Potential of Mesenchymal Stem Cells in Hindlimb Ischemia" by Lee *et al.* (2020), it was noticed that paper contains an error in Fig. 3C. Because of an unintentional error made during the preparation of the results, the authors mistakenly used the unmatched image of Transwell invasion assay. The authors wish to replace the image of Transwell invasion assay in Fig. 3C.

The corrected Fig. 3C is published here to avoid confusion for readers. The conclusion of the article is unaffected by the error. The authors apologize for this inadvertent error and for any inconvenience caused.

Fig. 3. (C) Transwell invasion assay in MSCs treated with melatonin. Scale bar=100 μ m.
