

Since January 2020 Elsevier has created a COVID-19 resource centre with free information in English and Mandarin on the novel coronavirus COVID-19. The COVID-19 resource centre is hosted on Elsevier Connect, the company's public news and information website.

Elsevier hereby grants permission to make all its COVID-19-related research that is available on the COVID-19 resource centre - including this research content - immediately available in PubMed Central and other publicly funded repositories, such as the WHO COVID database with rights for unrestricted research re-use and analyses in any form or by any means with acknowledgement of the original source. These permissions are granted for free by Elsevier for as long as the COVID-19 resource centre remains active.

## CORRECTIONS

In the July JADA article titled “Enhancement of Peripheral Seal of Medical Face Masks Using a 3-Dimensional–Printed Custom Frame” (Ahmed A, Zhong Z, Suprono M, et al. *JADA*. 2021;152[7]:542-550), Dr. Ahmed’s biography should read thus, “Dr. Ahmed is a research associate, Center for Dental Research, Loma Linda University School of Dentistry, A1019 Chan Shun Pavilion, 11175 Campus St, Loma Linda, CA 92350, email [aahmed@llu.edu](mailto:aahmed@llu.edu). Address correspondence to Dr. Ahmed.” The online version of this article has been corrected. JADA regrets the error. ■

In the July JADA article titled “Testing for COVID-19 in Dental Offices: Mechanism of Action, Application, and Interpretation of Laboratory and Point-of-Care Screening Tests” (Shirazi S, Stanford CM, Cooper LF. *JADA*. 2021;152[7]:514-525)

- the last line of the second full paragraph on page 515 should read thus “These tests are designed to have a

higher false-positive rate (lower sensitivity) but high specificity (low false-negative rates) with the desire to screen for and capture those with the disease at the risk of involving those who are uninfected with more invasive testing.”

- the third line of the third full paragraph on page 515 should read thus “These are designed with high sensitivity (high true positive and low false negative) and high specificity (high true negative and low false positive) in populations considered at high risk of developing the disease.”

The online version of this article has been corrected. JADA regrets the error. ■
