At the request of the Journal Editor(s) the following article has been retracted.

Jia F, Mou L, Ge H (2019) Protective effects of ginsenoside Rb1 on H₂O₂-induced oxidative injury in human endothelial cell line (EA.hy926) via miR-210. *International Journal of Immunopathology and Pharmacology* 33: 1-11. DOI: [10.1177/2058738419866021](https://doi.org/10.1177/2058738419866021).

Significant similarities between this paper and a number of other papers have been identified, as well as indication of image and data manipulation suggestive of the use of a “paper mill”. These papers share common structures and wording yet do not share any common authors.

The authors did not provide a sufficient response or evidence to refute these claims. As a result, the scientific accuracy of this paper is not reliable.

Adhering to the international guidelines established by the Committee on Publication Ethics, the Journal has determined these are grounds for retraction.
