

Correction to "Preterm birth, unplanned hospital contact and mortality in infants born to teenage mothers in five countries: an administrative data cohort study" acknowledgements

In connection to the publication of our manuscript in *Paediatric and Perinatal Epidemiology*,¹ we inadvertently missed disclosing the following approvals:

We hold Scottish data under approvals from the Privacy Advisory Committee (reference XRB13020) and the Public Benefit and Privacy Panel (reference 1516-0405).

The authors apologise for the oversight.
