Volume 92, no. 16, e00617-18, 2018, <https://doi.org/10.1128/JVI.00617-18>. Page 5:

In Fig. 2, there was a transposition error of the shaded boxes in the lower left (B*40) panel. The shading should have indicated recognition of the index epitope IL9 (Pol 357-365) and cross-recognition of the KL9 epitope (Gag 481-489).

The B*40 panel of Fig. 2 should appear as shown below.
