

LncRNA NEAT1 Promotes Proliferation, Migration and Invasion via Regulating miR-296-5p/CNN2 Axis in Hepatocellular Carcinoma Cells [Retraction]

Li Y, Ding X, Xiu S, Du G, Liu Y. *Onco Targets Ther.* 2019;12:9887–9897.

The Editor and Publisher of *OncoTargets and Therapy* wish to retract the published article. Concerns were raised regarding the integrity of some of the data provided in the article. The concerns related specifically to qPCR sequence data, the data presented in Table 1 and the images provided in Figure 7B. The authors responded to our queries but were unable to provide the original data for

their study. The authors decided it was best to retract the published article.

Our decision-making was informed by our policy on publishing ethics and integrity and the COPE guidelines on retraction.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as “Retracted”.

Publish your work in this journal

OncoTargets and Therapy is an international, peer-reviewed, open access journal focusing on the pathological basis of all cancers, potential targets for therapy and treatment protocols employed to improve the management of cancer patients. The journal also focuses on the impact of management programs and new therapeutic

agents and protocols on patient perspectives such as quality of life, adherence and satisfaction. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
