This Corrigendum corrects <https://doi.org/10.1002/pros.22989> which was published in *The Prostate* 75(10): 1051–1062.

After first online publication, the authors became aware of some errors in Figure 4. One of the FISH images for the patient ID, PCA-23 indicating *RAF* split in Figure 4B (bottom row first image) was inadvertently misplaced.

Upon re-examination of the original FISH data captured for the *RAF* and *BRAF* aberrations, the authors noticed that the representative

image for the *BRAF* rearrangement in PCA-77 in Figure 4A (panel A middle image) was inadvertently mixed up with the PCA-23 for *RAF* rearrangement in Figure 4B (bottom panel first image). It is possible that the mistake occurred while processing the microphotographs.

The corrected Figure 4 is shown below.

This correction does not affect the conclusions in the rest of the paper.

The authors wish to apologize for the mistake.
