Rather, it is an essential part of their academic freedom and their obligation to engage, publicly, in such discussions.

After publication of this article, concerns were raised regarding potential undeclared conflicts of interest. In light of this the authors have provided the following statement:

EH and TL have given talks and engaged in the mainstream media and academic press regarding the biology of sex and how they have concluded that this should impact sporting categories. All dissemination or engagement, irrespective of the medium, has been guided by their education, disciplinary training, and research findings. The authors assert that this does not constitute a conflict of interest.
