(Molecular Therapy: Nucleic Acids 19, 668–682; March 2020)

Redundant publications overweigh the relative importance of published findings and distort the academic record of the authors. One of the conditions of submission of a paper for publication is therefore that authors declare explicitly that the paper has not been previously published and is not under consideration for publication elsewhere. As such, this article represents a misuse of the scientific publishing system.

The scientific community takes a very strong view on this matter, and apologies are offered to readers of the journal that this was not detected during the submission process.
