In the original article, there was a mistake in **Figure 2** as published. In **Figure 2A**, **C4d staining results in the NS group 1d and 2d have overlapping regions indicating that they are from the same sample. After carefully checking the original data, the image 1d was misused by accident when we were preparing for manuscript submission.** The corrected **Figure 2** appears below.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
