

Application of Radiosensitizers in Cancer Radiotherapy [Corrigendum]

Gong L, Zhang Y, Liu C, Zhang M, Han S. *Int J Nanomedicine*. 2021;16:1083–1102.

The authors have advised there is an error with the reference list on page 1100. Reference 160 should read as follows.

160. Gong LJ, Xie JN, Zhu S, Gu ZJ, Zhao YL. Application of multifunctional nanomaterials in tumor radiosensitization. *Acta Phys Chim Sin*. 2018;34(2):140–167. doi.org/10.3866/PKU.WHXB201707174

The updated reference should have also been cited in the additional following places:

Page 1092, Heavy Metal Nanomaterials section, second sentence, the text should read “Based on this, numerous studies have focused on these heavy metal nanomaterials to investigate their radiotherapy sensitization.¹⁶⁰”

Page 1094, Nonmetallic Nanomaterials section, second sentence, the text should read “For example, C₆₀, full-erene, has potent anticancer activities, however, the potential toxicity to normal tissues limits its further use.¹⁶⁰”

The authors apologize for these errors.

The International Journal of Nanomedicine is an international, peer-reviewed journal focusing on the application of nanotechnology in diagnostics, therapeutics, and drug delivery systems throughout the biomedical field. This journal is indexed on PubMed Central, MedLine, CAS, SciSearch®, Current Contents®/Clinical Medicine,

Journal Citation Reports/Science Edition, EMBase, Scopus and the Elsevier Bibliographic databases. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
