(Molecular Therapy 27, 2166–2181; December 2019)

In the originally published version of this article, there was overlap between several control images in Figure 2A. We have replaced these images with a new set of control images from each group to show the specificity of the probes. This correction does not alter the conclusions of the original article. The authors regret this error.

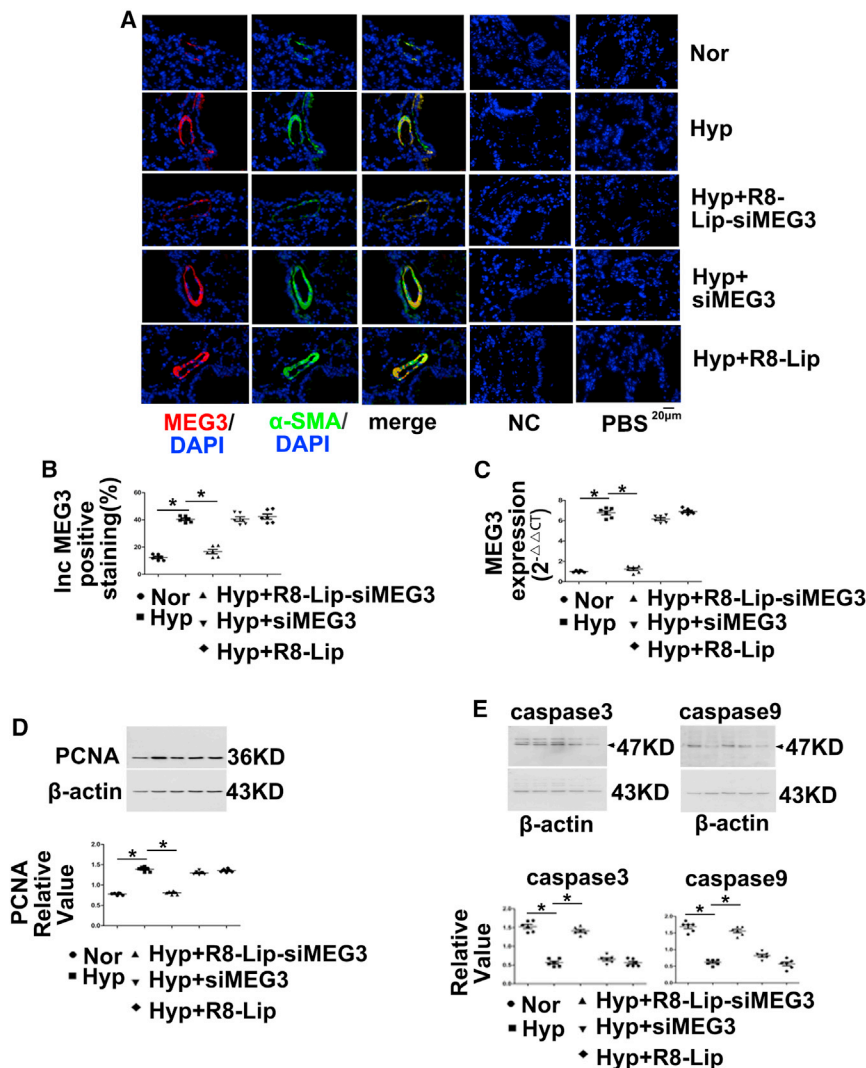

Figure 2. Pulmonary-Specific lncRNA-MEG<sub>3</sub> Knockdown Prevented Hypoxia-Induced Pulmonary Hypertension (corrected)
