## Retraction of “Rh-Catalyzed Aziridine Ring Expansions to Dehydropiperazines”

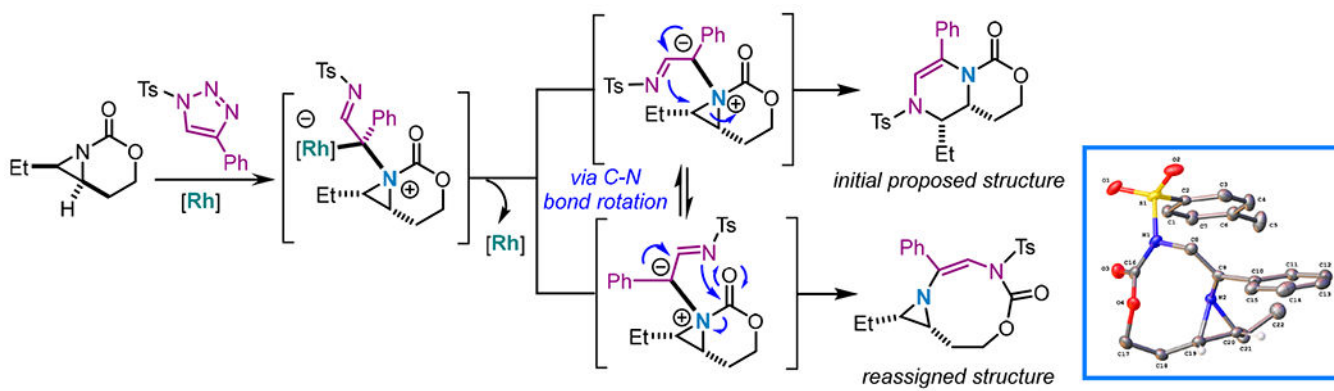

Hillary J. Dequina, Josephine Eshon, William T. Raskopf, Israel Fernández, Jennifer M. Schomaker

---

The authors retract this Letter upon discovering structural misassignments in which compounds identified as unsaturated piperazines (**6aa–6ai**, **6bb–6fb**) are actually [3.9]-bicyclic aziridines (Figure 1).

The authors are in the process of submitting a new article with the revised structural assignments and additional insights.

The original letter was published on April 22, 2020, and retracted on February 11, 2022.
