(Molecular Therapy 25, 2394–2403; October 2017)

This article has been retracted at the request of the editors. After investigating concerns of image duplication raised by a reader, evidence for image duplication in identical or altered fashion in Figures 2D, 3H, and 5C was identified. This reuse (and in part misrepresentation) of data without appropriate attribution represents a severe abuse of the scientific publishing system.
