Disease Severity Scoring for COVID-19: A Welcome (Semi)Quantitative Role for Chest Radiography

Brent P. Little

Erratum in:

<https://doi.org/10.1148/radiol.2021219022>

A typo appeared in the in-press article and the sentence was corrected as follows: “The Brixia score proposed by Borghesi et al. in 2020 is similar but uses 6 zones and a slightly different grading of opacities, resulting in score ranging from 0-**18**.”
