

Since January 2020 Elsevier has created a COVID-19 resource centre with free information in English and Mandarin on the novel coronavirus COVID-19. The COVID-19 resource centre is hosted on Elsevier Connect, the company's public news and information website.

Elsevier hereby grants permission to make all its COVID-19-related research that is available on the COVID-19 resource centre - including this research content - immediately available in PubMed Central and other publicly funded repositories, such as the WHO COVID database with rights for unrestricted research re-use and analyses in any form or by any means with acknowledgement of the original source. These permissions are granted for free by Elsevier for as long as the COVID-19 resource centre remains active.

## Erratum Regarding Previously Published Articles

The Open Access funding statement were not included in the published version of below list of the articles, and we confirm that the Open Access for these articles is made possible by a collaboration between Health Policy and The European Observatory on Health Systems and Policies.

- The political economy of austerity and healthcare: Cross-national analysis of expenditure changes in 27 European nations 1995–2011
- Effects of the economic crisis on health and healthcare in Greece in the literature from 2009 to 2013: A systematic review
- Health policy making under information constraints: An evaluation of the policy responses to the economic crisis in Greece
- Accountable care organizations in the USA: Types, developments and challenges
- A roadmap for comparing readmission policies with application to Denmark, England, Germany and the United States
