Correction: Engagement with protective behaviours in the UK during the COVID-19 pandemic: a series of cross-sectional surveys (the COVID-19 rapid survey of adherence to interventions and responses [CORSAIR] study)

Louise E. Smith^{1,2*}, Henry W. W. Potts³, Richard Amlôt^{2,4}, Nicola T. Fear^{1,5}, Susan Michie⁶ and G. James Rubin^{1,2}

Correction: *BMC Public Health* 22, 475 (2022)

<https://doi.org/10.1186/s12889-022-12777-x>

The original publication of this article [1] contained some errors as a result of the dataset provided to the authors.

There was a problem concerning the variable denoting responder ID. For one panel used, all respondents were assigned unique IDs each time they completed a survey, regardless of whether they had previously completed the survey.

Therefore, repeat respondents were not identified. This affected data in waves 8 to 57 (inclusive). The authors have since worked with the market research companies to rectify this problem. For another article, re-running generalised estimating equations (GEEs) using corrected responder IDs did not meaningfully change results [2].

This should not affect the results nor conclusions of this article [1].

Full list of author information is available at the end of the article

This work was funded by the National Institute for Health Research (NIHR) Health Services and Delivery Research programme (NIHR project reference number (11/46/21)). Surveys were commissioned and funded by Department of Health and Social Care (DHSC), with the authors providing advice on the question design and selection. LS, RA and GJR are supported by the National Institute for Health Research Health Protection Research Unit (NIHR HPRU) in Emergency Preparedness and Response, a partnership between the UK Health Security Agency, King's College London and the University of East Anglia. RA is also supported by the NIHR HPRU in Behavioural Science and Evaluation, a partnership between the UK Health Security Agency and the University of Bristol. HWWP has received funding from Public Health England and NHS England. NTF is part funded by a grant from the UK Ministry of Defence. The views expressed are those of the authors and not necessarily those of the NIHR, UK Health Security Agency, the Department of Health and Social Care or the Ministry of Defence. The Department of Health and Social Care funded data collection (no grant number).

Competing interests statement

All authors had financial support from NIHR for the submitted work. RA is an employee of the UK Health Security Agency; HWWP received additional salary support from Public Health England and NHS England; HWWP receives consultancy fees to his employer from

Ready to submit your research? Choose BMC and benefit from:

- fast, convenient online submission
- thorough peer review by experienced researchers in your field
- rapid publication on acceptance
- support for research data, including large and complex data types
- gold Open Access which fosters wider collaboration and increased citations
- maximum visibility for your research: over 100M website views per year

At BMC, research is always in progress.
