RETRACTION

Open Access Full Text Article

MicroRNA-769-5p Promotes the Growth of Glioma Cells by Targeting Lysine Methyltransferase 2A [Retraction]

Chang M, Yan P, Zhang B, et al. Onco Targets Ther. 2019;12:9177-9187.

At the authors request, the Editor and Publisher of *OncoTargets and Therapy* wish to retract the published article. Following publication, the authors performed an STR analysis on the A172 cells used in the study and they were determined to be contaminated with HeLa cells. In addition, the authors were unable to provide adequate original data for their study and deemed the findings to be unreliable. The authors requested for the article to be retracted and the Editor agreed with this decision.

Our decision-making was informed by our policy on publishing ethics and integrity and the COPE guidelines on retraction.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as "Retracted".

Publish your work in this journal

OncoTargets and Therapy is an international, peer-reviewed, open access journal focusing on the pathological basis of all cancers, potential targets for therapy and treatment protocols employed to improve the management of cancer patients. The journal also focuses on the impact of management programs and new therapeutic agents and protocols on patient perspectives such as quality of life, adherence and satisfaction. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit http://www.dovepress.com/testimonials.php to read real quotes from published authors.
