

## Circular RNA circGSEI Promotes Cervical Cancer Progression Through miR-138-5p/Vimentin [Retraction]

Fan S, Zhao S, Gao X, et al. *Onco Targets Ther.* 2020;13:13371-13386.

The Editor and Publisher of *OncoTargets and Therapy* wish to retract the published article. Concerns were raised following the authors request to replace several western blot and cell migration and invasion images in Figures 2, 4 and 6. The authors were unable to provide a satisfactory explanation for why the images required replacing, nor were they able to provide original data that could adequately verify the findings. The Editor determined the reported findings were unreliable and requested for the article to be retracted. The authors were notified of this decision.

Our decision-making was informed by our policy on publishing ethics and integrity and the COPE guidelines on retraction.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as “Retracted”.

### Publish your work in this journal

OncoTargets and Therapy is an international, peer-reviewed, open access journal focusing on the pathological basis of all cancers, potential targets for therapy and treatment protocols employed to improve the management of cancer patients. The journal also focuses on the impact of management programs and new therapeutic agents and protocols on patient perspectives such as quality of life, adherence and satisfaction. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
