CORRIGENDUM

## COVID-19 Vaccination Breakthrough Infections in a Real-World Setting: Using Community Reporters to Evaluate Vaccine Effectiveness [Corrigendum]

Reynolds MW, Xie Y, Knuth KB, et al. Infect Drug Resist. 2022;1:5167-5182.

Page 5172, Figure 2, the text "7,352 completed vaccine regimen" should read "7,532 completed vaccine regimen" and "1,014 never reported infection". The correct Figure 2 is as follows.

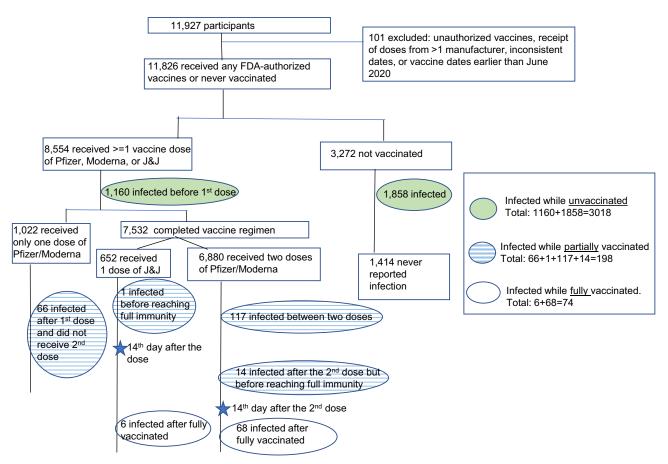

Figure 2 Flowchart of study sample and participant counts with COVID-19 infection.

Page 5172, COVID-19 Infected Study Participants section, 2nd line, the text "(31.8% and 20.3%, were college-educated versus 40.5% among fully vaccinated)" should read "(31.8% and 20.3%, were above-college-educated versus 40.5% among fully vaccinated)".

Page 5172, COVID-19 Symptoms and Impact Among Vaccinated vs Unvaccinated section, 2nd paragraph, line 6, the text "1.6% among the 198 infected after partial vaccination, and 2.0% among the 3018 infected while unvaccinated"

Publish your work in this journal

Infection and Drug Resistance is an international, peer-reviewed open-access journal that focuses on the optimal treatment of infection (bacterial, fungal and viral) and the development and institution of preventive strategies to minimize the development and spread of resistance. The journal is specifically concerned with the epidemiology of antibiotic resistance and the mechanisms of resistance development and diffusion in both hospitals and the community. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit http://www.dovepress.com/testimonials.php to read real quotes from published authors.
