Author manuscript

*Nanomedicine (Lond)*. Author manuscript; available in PMC 2022 October 28.

Published in final edited form as:

*Nanomedicine (Lond)*. 2023 March ; 18(6): 577. doi:10.2217/nnm.15.67r1.

## Retraction

---

This article has been retracted: please see Future Science Group Policy on retractions (<https://www.futuremedicine.com/authorguide/editorialpolicies>).

Yin R, Agrawal T, Khan U *et al*. Antimicrobial photodynamic inactivation in nanomedicine: small light strides against bad bugs. *Nanomedicine (Lond)*. 10(15), 2379–2404 (2015).

The editors of *Nanomedicine* have found that sections of this article are substantially similar to sections of previously published works and are not credited to the original authors. The editors have therefore decided to retract the article. MH agrees with this decision; the other authors did not respond or could not be contacted.

The editors of *Nanomedicine* regret any negative consequences this publication might have caused in the scientific and medical communities.
