### Correction to: *Drugs* (2022) 82:957–963

<https://doi.org/10.1007/s40265-022-01742-y>

Page 960, Section 3.2.1 Tecovirimat, second-to-last sentence, which currently reads:

“The protocol also includes allowance for opening an oral capsule and mixing its content with liquid or soft food for pediatric patients weighing less than 13 kg”

Should more accurately read:

The protocol also includes allowance for opening an oral capsule and mixing its content with liquid or soft food for pediatric patients weighing less than 13 kg; however, patients weighing 3kg and above can receive more accurate intravenous dosing.
