

Statement of Retraction: CircLNPEP promotes the progression of ovarian cancer through regulating miR-876-3p/ WNT5A axis

We, the authors, Editor and Publisher of the journal *Cell Cycle*, have retracted the following article:

Wenwen Wang, Weiwei Zhang, Hongjun Guo, Danxia Chu, Ruitao Zhang, and Ruixia Guo. CircLNPEP promotes the progression of ovarian cancer through regulating miR-876-3p/ WNT5A axis. *Cell Cycle*. 2021;20(19):2021-2039. doi: [10.1080/15384101.2021.1965723](https://doi.org/10.1080/15384101.2021.1965723)

Since publication, the authors noticed certain errors with the research results in the paper, which need to be further explored. As this error directly impacts the reported results and conclusions the authors alerted the issue to the Editor and Publisher, and all have agreed to retract the article to ensure correction of the scholarly record. The authors plan to revise their work and resubmit to the journal in the future.

We have been informed in our decision-making by our policy on publishing ethics and integrity and the COPE guidelines on retractions.

The retracted article will remain online to maintain the scholarly record, but it will be digitally water-marked on each page as 'Retracted'.
