---

This article has been retracted at the request of the editors. This article was published on December 8, 2009. In November 2021, The Ohio State University notified the *Cancer Cell* editors that this article contains ten instances of plagiarized text; that Figures 1G, 5B, 5E, 7D, and 7F were falsified; and that part of Figure 1G in the article is the same as part of Figure 1B in another article that was later retracted (Garofalo et al., 2008, *PLOS One* 3, e4070, <https://doi.org/10.1371/journal.pone.0004070>). The university recommended the editors correct or retract the article. Given the extent and severity of these issues, the editors are retracting the article. S.-S. S. agrees with the retraction, and M.G., G.D.L., G.N., F.P., P.S., P.G., G.C., and C.M.C. disagree with the retraction; all other authors couldn't be reached or didn't respond.
