Correction to 'COVID-19: the case for aerosol transmission' 2022 by Tellier

Raymond Tellier

RT, 0000-0002-0117-8009

Interface Focus **12**, 20210072. (Published 11 February 2022). (<https://doi.org/10.1098/rsfs.2021.0072>)

Please note the following correction. In §3 (page 2, right-hand column), the sentence 'Isolation of SARS-CoV-2 in cell culture was successful with two fine aerosol samples with a load estimated at greater than 10^4 RNA copies (one of which contained the alpha variant).' should read as follows:

Isolation of SARS-CoV-2 in cell culture was successful with two fine aerosol samples, one of which contained the alpha variant with a load estimated at greater than 10^4 RNA copies.
