

Since January 2020 Elsevier has created a COVID-19 resource centre with free information in English and Mandarin on the novel coronavirus COVID-19. The COVID-19 resource centre is hosted on Elsevier Connect, the company's public news and information website.

Elsevier hereby grants permission to make all its COVID-19-related research that is available on the COVID-19 resource centre - including this research content - immediately available in PubMed Central and other publicly funded repositories, such as the WHO COVID database with rights for unrestricted research re-use and analyses in any form or by any means with acknowledgement of the original source. These permissions are granted for free by Elsevier for as long as the COVID-19 resource centre remains active.

Corrigendum to “Identifying the impacts of the COVID-19 pandemic on service access for people who use drugs (PWUD): A national qualitative study” [Journal of Substance Abuse Treatment 129 (2021) 108374]

The authors regret the omission of a vital acknowledgement section. The authors would like to thank everyone who contributed to this study's success. Specifically, we would like to thank the national CRISM team, including NPIs (Dr. Evan Wood; Dr. Cameron Wild; Dr. Julie Bruneau); Node managers (Denise Adams; Nirupa Goel; Aissata Sako); Node researchers (Jade Boyd; Elaine Hyshka; Jennifer Swansburg); PWLE advisory members and the service providers who supported us throughout the project, including with participant recruitment; The

Quebec Node (Kristine Gagnon Lafond; Marianne Quenneville-Dumont) and Ontario Node (Rashmi Narkar; Jeanette Bowles) researchers who provided their invaluable time interviewing participants and assisting with data translation and coding; as well as the individual PWUD participants who shared their lived expertise with use, without which the study could not have been conducted.

The authors would like to apologise for any inconvenience caused.
