Retraction Note: Molecular analysis of the effects of Piroxicam and Cisplatin on mesothelioma cells growth and viability

Alessandra Verdina¹, Irene Cardillo¹, Angela Nebbioso², Rossella Galati¹, Simona Menegozzo⁴, Lucia Altucci², Ada Sacchi¹ and Alfonso Baldi^{1,3*}

Retraction: *Journal of Translational Medicine* 2008, 6:27
<https://doi.org/10.1186/1479-5876-6-27>

The Editor-in-Chief has retracted this article [1]. After publication, concerns were raised regarding potential issues in the western blot images presented in the figures. Specifically:

- Two pairs of bands appear highly similar in Fig. 5a—MSTO C CycD1 (CTRL 3 h and 6 h) and P + C Actin (CTRL 6 h and 24 h).
- A number of bands appear highly similar in Fig. 6b P + C Actin.
- Also in Fig. 6b, NCI P p21 bands (CTRL 6 h and 24 h) appear highly similar to P + C p21 bands (CTRL 3 h and 6 h).
- All NCI Actin bands appear to be highly similar in Figs. 5a and 6b.
- NCI C Actin bands in Figs. 5a and 6b appear to be highly similar but rotated 180 degrees, with the same bands representing different groups.
- In Fig. 6b NCI blots, some backgrounds appear inconsistent and contain unexpected breaks or changes between bands.

As the article was published in 2008, the authors are unable to provide the raw data used to produce these figures. The Editor-in-Chief therefore no longer has confidence in the presented data.

Alfonso Baldi does not agree to this retraction. Angela Nebbioso and Lucia Altucci have not explicitly stated whether they agree to this retraction. Simona Menegozzo has not responded to any correspondence from the editor or publisher about this retraction. The Publisher has not been able to obtain a current email address for author Alessandra Verdina, Irene Cardillo, Rossella Galati and Ada Sacchi.
