The Journal Editors and SAGE Publishing hereby issue an expression of concern for the following article:

Ruan F, Wang Y, Chai Y. Diagnostic Values of miR-21, miR-124, and M-CSF in Patients With Early Cervical Cancer. *Technology in Cancer Research & Treatment*. January 2020. doi:10.1177/1533033820914983

The concern is about a dispute of authorship brought to our attention by Yun Chai. The claim is that the article was published without permission from one of the authors.

The journal has not been presented with enough evidence to make a decision in favor of either party to the dispute.

The concern and this note will remain appended to the above-mentioned article, unless the parties provide the editor of *Technology in Cancer Research & Treatment* with a solution to the dispute.
