

In “Recovery of Infectious Hepatitis C Virus from Injection Paraphernalia: Implications for Prevention Programs Serving People Who Inject Drugs” by Heimer et al. [*J Infect Dis* **2018**; 217:466–473. doi: 10.1093/infdis/jix427], incorrect values are

presented in Figure 2A for the “input” and “receptive” syringes. The figure shows 33 of 70 and 62 of 70, respectively; it should read 43 of 70 and 66 of 70.
