## Erratum regarding missing patient consent statements in previously published articles

### ARTICLE INFO

#### Article history:

Available online 15 January 2023

Patient consent statements were not included in the published version of the following articles that appeared in previous issues of Radiology Case Reports.

The appropriate statements are provided below.

1. “Uterine artery embolization combined with methotrexate for broad ligament ectopic pregnancy in a 30-year old primi-gravida” [Radiology Case Reports, 2021; 16 (8): 2248-2251] DOI [10.1016/j.radcr.2021.05.032](https://doi.org/10.1016/j.radcr.2021.05.032)  
Patient consent: Patient consent was both verbally obtained and via forms that are standard with the hospital intake.
2. “Endovascular therapy in cerebrovascular event due to internal carotid artery tandem injuries: A case report” [Radiology Case Reports, 2021; 16 (8): 2095-2098] DOI [10.1016/j.radcr.2021.05.020](https://doi.org/10.1016/j.radcr.2021.05.020)  
Patient consent: Informed consent was obtained verbally. There is evidence of verbal consent recorded and in the custody of the clinical research center and the institution’s ethics committee. Members of the research group obtained consent, and witnesses were present.
3. “Emergent transcatheter arterial embolization to control critical blood pressure fluctuation associated with hypercatecholaminemic crisis in a patient with an unruptured retroperitoneal paraganglioma” [Radiology Case Reports, 2021; 16 (8): 2065-2071] DOI [10.1016/j.radcr.2021.05.018](https://doi.org/10.1016/j.radcr.2021.05.018)  
Patient consent: Patient consent(s) held in form(s).
