(Molecular Therapy 13, 928–937; May 2006)

This article has been retracted at the request of the editor-in-chief. Similarities were reported between images in this article and an article in *Clinical Cancer Research* (Zhou et al., 2005, *Clin. Cancer Res.* 11, 8431-8440, <https://10.1158/1078-0432.CCR-05-1085>). Q.J., J.Z., X.H., G.C., Y.L., K.L., L.Z., and D.M. were all authors of the *Clinical Cancer Research* paper as well. These concerns were initially reported in a Pubpeer thread (<https://pubpeer.com/publications/FF881782FF5AFD316D42E0C0F00766>). Image analysis performed by the editorial office confirmed findings of image recycling in Figures 2A and 3B of the *Molecular Therapy* article. This reuse (and in part misrepresentation) of data without appropriate attribution represents a severe abuse of the scientific publishing system.
