The Editors-in-chief have retracted this article because after publication concerns have been raised regarding a number of figures, specifically:

- Figure 3a: the 24h panels for m-NC and i-NC appear to be identical.
- Figure 4f: the AGS and BGC-823 panels for miR-4490/USP22 appear to partially overlap.

The Editors-in-Chief therefore consider the data reported in this the article to be unreliable.

Jide Wang does not agree to this retraction. The editor was not able to obtain a current email address for Tianming Chen. None of the other authors have responded to any correspondence regarding this retraction.
