

Since January 2020 Elsevier has created a COVID-19 resource centre with free information in English and Mandarin on the novel coronavirus COVID-19. The COVID-19 resource centre is hosted on Elsevier Connect, the company's public news and information website.

Elsevier hereby grants permission to make all its COVID-19-related research that is available on the COVID-19 resource centre - including this research content - immediately available in PubMed Central and other publicly funded repositories, such as the WHO COVID database with rights for unrestricted research re-use and analyses in any form or by any means with acknowledgement of the original source. These permissions are granted for free by Elsevier for as long as the COVID-19 resource centre remains active.

## Corrigendum to: “Development and validation of a prediction model for severe respiratory failure in hospitalized patients with SARS-CoV-2 infection: a multicentre cohort study (PREDI-CO study)” Clinical Microbiology and Infection 26 (2020) 1545–1553

The authors regret that an author's name which should be on the list of the PREDICO study group was mistakenly listed in the appendix at the end of the article. Further, on Pubmed (<https://pubmed.ncbi.nlm.nih.gov/32781244/>) the name is wrongly reported as an affiliation (<sup>19</sup>Lucia Diella Infectious Disease Unit - Department of Biomedical Sciences and Human Oncology, University of Bari, Policlinico di Bari, Italy.) It should be <sup>19</sup>Infectious Disease Unit - Department of Biomedical Sciences and Human Oncology, University of Bari, Policlinico di Bari, Italy. This affiliation belongs to Lucia Diella.

The authors would like to apologise for any inconvenience caused.
