

Suppl Fig 1: Cumulative incidence function stratified by study (panels) and treatment arm (color) to estimate the irAE probability (any grade) over time while considering death as a competing event. One separate plot for each irAE type: A) Rash, B) Hepatitis.

A) Rash

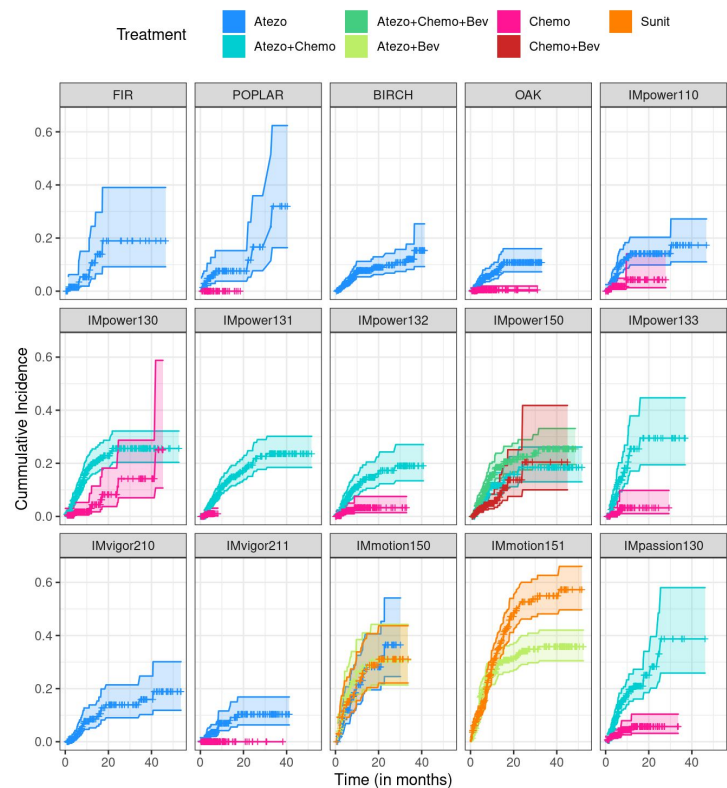

B) Hepatitis

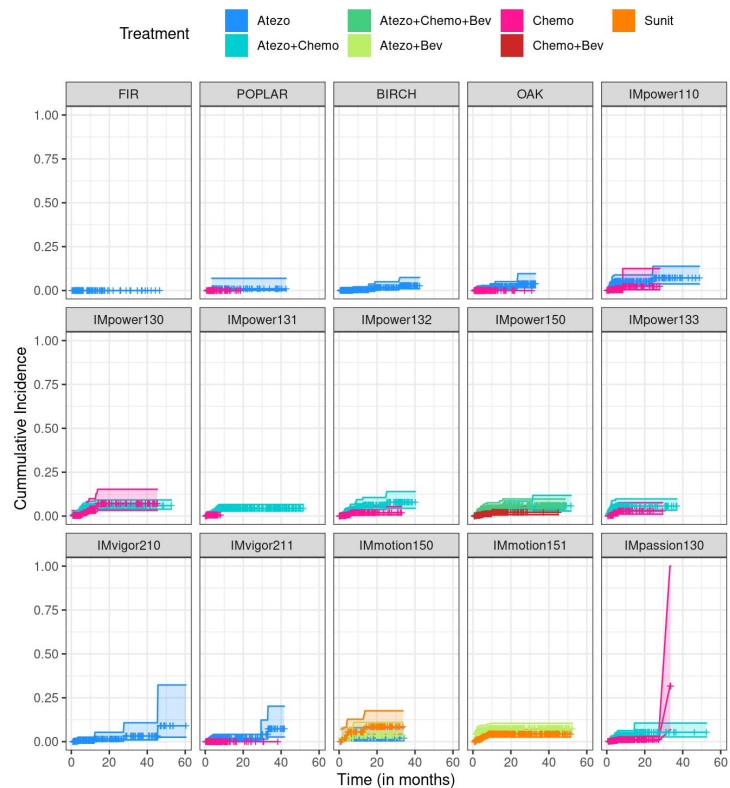

Suppl Fig 1: Cumulative incidence function stratified by study (panels) and treatment arm (color) to estimate the irAE probability (any grade) over time while considering death as a competing event. One separate plot for each irAE type: A) Rash, B) Hepatitis, C) Hypothyroidism, D) Hyperthyroidism, E) Pneumonitis.

C) Hypothyroidism

D) Hyperthyroidism
