

S9 Fig. Comparisons between SSRI-medicated and unmedicated OCD patients.

Effect sizes of the negative reward prediction error in reward trials for the HC, SSRI-medicated OCD, and unmedicated OCD groups (mean \pm SEM). *Left*, dorsomedial prefrontal cortex (dmPFC); and *right*, dorsal striatum. *Grey bars*, HC; *open bars*, SSRI-medicated OCD; and *orange bars*, unmedicated OCD. HC, healthy control; OCD, obsessive-compulsive disorder; SSRI, selective serotonin reuptake inhibitors.
