

Figure S1. GPC3 and PD-L1 are expressed in HCC cell lines. (A) The expression of GPC3 and PD-L1 in SNU182, HCCLM3, HuH7 and SNU423 cells was detected using western blotting. (B) GPC3 expression was knocked down in HuH7 cells via GPC3 shRNA transfection. Data are presented as the mean \pm SD. *** P <0.001. GPC3, glypican-3; PD-L1, programmed death ligand 1; HCC, hepatocellular carcinoma.
