2. Please provide an explanation for the change in authorship (including any reasons for removal from authorship list).

We're sorry to cause trouble to the editor's work. Due to the sudden outbreak of the COVID-19 epidemic in Changchun city, our hospital has a very busy job. And because of the city blockade, we can't conduct research and experiments can't work properly. So we turned to former colleagues (Tinghong Pan, Hui Wang and Shuai Wang) who were in the same research group to help us with this research. They previously participated in the design of this study and further investigated the correlation of down-regulation of lncRNA FAM138B with TNM stage and lymph node metastasis, and provided bar graphs for better visualization. In order to further verify the relationship between FAM138B and miR-105-5p, this paper supplemented the rescue experiment. They have contributed greatly to the improvement of the quality of the manuscript, and they meet the requirements of the authors, so all authors agree to add them to the author list and sign below.
