

# Evaluation of the attractiveness of the lips

You are invited to participate in the research entitled "Assessment of the attractiveness of lips with different thicknesses after filling with hyaluronic acid." This research was approved by the Research Ethics Committee of Uningá (n. 4.181). The objective is to evaluate the lips' attractiveness. You will have to assess the photographs of the lips and give a score from 0 to 10, with 0 being unattractive and 10 being the most attractive possible.

## Evaluation of the lips' attractiveness

Give a score from 0 to 10 to each of the following lips. Remember that 0 is unattractive, and 10 is the most attractive possible.

Pergunta \*

Pergunta \*

A close-up photograph of a person's lips. The upper lip features a prominent, dark, irregular mole or lesion located on the left side. The skin around the mole appears slightly darker and textured compared to the surrounding skin. The lower lip is visible at the bottom, and the background is a solid black.

Pergunta \*

A close-up photograph of a person's lips. The lips are slightly parted, revealing a pinkish-red color. The skin around the lips appears slightly textured and aged. The lighting is soft, highlighting the natural contours of the lips.
