Fig. S1

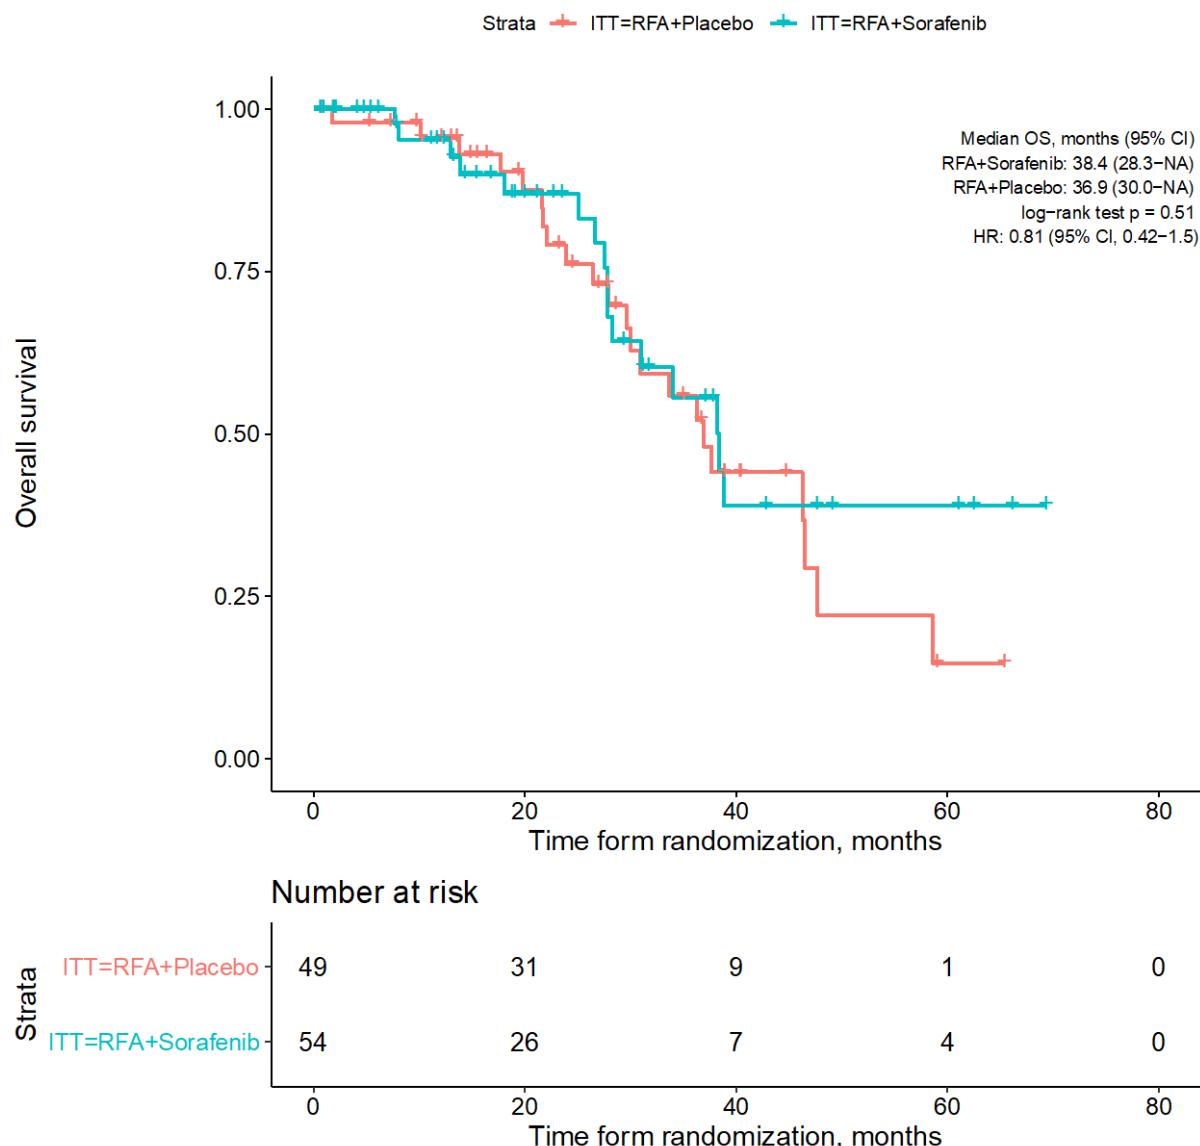

General scheme for dose re-escalation.

Fig. S2 Time-to-recurrence in ITT population based on independent assessment

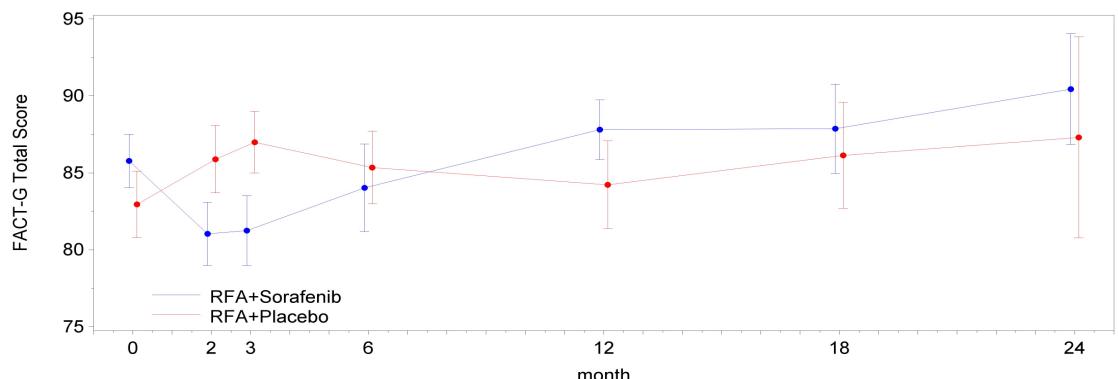

Kaplan-Meier curves comparing time-to-recurrence between two treatment arms in intention-to-treat population. No significant difference ($p=0.82$, log rank test).

Fig. S3 Overall survival in ITT population

Kaplan-Meier curves comparing overall survival between two treatment arms in intention-to-treat population. No significant difference ($p=0.51$, log rank test).

Fig. S4 Longitudinal analysis of FACT-G questionnaire for ITT population

Blue line represents RFA+Sorafenib arm and red line RFA+Placebo arm.
