

Supplemental data

Table S1. BIF of variables (variable selection for serum concentration)

Variables	C _{min}	C _{max}
CRRT	99.5%*	32.5%
ALT	50.1%*	29.7%
AST	35.4%	26.3%
TB	20.2%	16.6%
ALB	21.1%	31.7%

*Selected in final multivariate models. Variables were selected by bootstrapped stepwise regression method.

BIF: bootstrap inclusion frequency.
