

Supplementary Figure 11

Supplementary Figure 11. Representative dot plots for data shown in figure 4G-H and additional myeloid composition analysis in mice bearing 4T1 metastases. A, Representative dot plots and quantification of CD11b⁺ population as a frequency of CD45⁺ cells in isolated lung tissues of each group. B, Representative dot plots of F4/80⁺ population as a frequency of CD45⁺CD11b⁺ cells in isolated lung tissues of each group. C, D, Representative dot plots and quantification of CD86⁺ (C) and CD206⁺ (D) population as a frequency of CD45⁺CD11b⁺F4/80⁺ cells in isolated lung tissues of each group. In all panels, *p<0.05, n = 4 for shScramble and shPTPN11 146, n = 5 for shPTPN11 369.
