

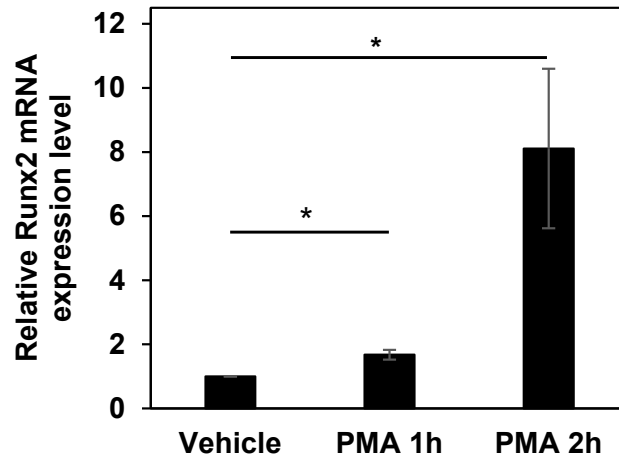

## Figure S3

**Figure S3. PKC $\alpha$  activation robustly upregulates Runx2 mRNA expression by 2 h.**

IEC-18 cells were treated with vehicle or PMA for the indicated times and levels of Runx2 mRNA (normalized to 18 S RNA) were assessed by RT-qPCR. Data are averages  $\pm$  s.e.m. of at least 3 independent experiments. \*,  $p < 0.05$ .
