

Supplement File 3. Global Andrology Forum: pre-meeting practice test.

Global Andrology Forum Pre-meeting practice test

This module is based on five research papers that were analyzed for the SRMA-1. The cumulative responses from this test will be used as a starting point for our discussion during the meeting on Feb 3rd. Please make a note of the doubts you may have when answering these questions, and ask us later at the meeting. This module will close on Monday, January 31st, 5:00 p.m. EST. Once the link is closed, you will not be permitted to take the test.

Multiple Choice Questions:

Pre-meeting Practice Test

Item #1176: Based on the PICO (Population, Intervention, Comparators and Outcome) model of the SRMA1 on varicocele, item #1176 should be:

- Included due to suitable outcome data
- Included due to suitable study population and comparators
- Excluded due to different study population and comparators
- Excluded due to different intervention

Item #1383: Please indicate the SD of the mean of sperm count in the group of patients:

- 39.0
- 6.6
- 10.4
- None of them

Item #37: Based on the PICO (Population, Intervention, Comparators and Outcome) model of the SRMA1 on varicocele, the correct design that describes item #37 is:

- Randomized controlled trial (RCT)
- Non-randomized controlled study
- Case-control
- Uncontrolled cohort

Item #1078: Based on the PICO (Population, Intervention, Comparators and Outcome) model of the SRMA1 on varicocele, the correct design that describes item #1078 is:

- Randomized controlled trial (RCT)
- Case-control
- Controlled cohort
- Uncontrolled cohort

Item #2925: Based on quality assessment, item #2925 is best described as:

- High quality randomized controlled trial (RCT)
- High quality controlled cohort
- Low quality RCT
- Low quality controlled cohort
