主题: Request for adding an author in our manuscript CDDIS-22-3496

Dear co-authors,

Thank you very much for your contribution to our manuscript entitled "RIP3-mediated microglial necroptosis promotes neuroinflammation and neurodegeneration in the early stages of diabetic retinopathy" (ID: CDDIS-22-3496). The manuscript has been provisionally accepted for publication in Cell Death & Disease.

I am writing to you because I am wishing to add Dr. Marten E. Brelén as an extra author, who has contributed much to the revised version of our manuscript. After we received the referee's comments, he did a great job for the review of the whole manuscript for grammatical accuracy and clarity. We could not finish the revised version without his hard work. Therefore, I wish to add Dr. Brelén as a new author to the paper. Please find attached the title page of the manuscript.

If you agree to this proposal, please kindly respond to this email. Please also contact me if you have disagreement or any other question.

Thank you again for your kind contribution to this work.

Best wishes,

Zijing Huang

主题: CDDIS-22-3496RR Initial Quality Check

Dear Dr Huang,

In checking in your manuscript submitted to Cell Death & Disease it has come to our attention that the following must be addressed before we can proceed.

1. It has come to our attention that your most recent author list differs from the one in your original submission. We find that the following authors have been added since your initial submission: Marten E. Brelén.

Please request agreement from all authors including additions and deletions, these can be collected in the following way:

Email your co-authors with the change, and ask them to reply to your email confirming that they agree to these changes. Once you have collected these replies, please combine all of the co-authors' email responses in one document and upload this file to your submission

2. Please make sure you include a data availability statement in your Article file under its own subheading.
