

Supplementary Figure1. correlation WBC(A), Neutrophil(B), Lymphocyte(C) and NLR(D) with SHR in AIS. SHR=fasting blood glucose (mmol/L)/HbA1c (%); WBC: white blood cells; NLR, neutrophil-to-lymphocyte ratio; AIS: acute ischemic stroke.

Supplementary Figure 2: The Differences of WBC, Neutrophil, lymphocyte, and NLR between good outcome group and poor outcome group at discharge. WBC: white blood cells; NLR, neutrophil-to-lymphocyte ratio; mRS: modified Rankin Scale. *P<0.05;p<0.001; good outcome group(mRS \leq 2); poor outcome group(mRS>2).**
