<sup>\*</sup> Interventions employed in humanitarian settings

# Glossary of Key Terms

| Beneficiary            | The individuals or households who are targeted to     |
|------------------------|---|
|                        | benefit from the social protection intervention. This |
|                        | can include or go beyond the recipient.               |
| Catastrophic Costs     | Total TB care costs, that is direct medical (i.e.     |
|                        | consultations, tests, pills) and non-medical (i.e.    |
|                        | food, travel, accommodation) out-of-pocket costs      |
|                        | and lost income exceeding 20% of a household's        |
|                        | annual pre-TB income, exceeding 20% of annual         |
|                        | household income                                      |
| Conditional Cash       | Direct, regular, and predictable transfers that are   |
| Transfer               | given with the requirement that the recipient meets   |
|                        | certain conditions.                                   |
| Direct costs           | Costs that are directly attributable to patient care  |
|                        | and paid for out-of-pocket. Can include direct        |
|                        | medical (i.e. consultations, tests, pills) and non-   |
|                        | medical (i.e. travel, food, accommodation) out-of-    |
|                        | pocket costs)   |
| Financial Intervention | Any social protection intervention in the form of a   |
|                        | financial payment to the recipient.                   |
| Indirect costs         | Costs incurred during treatment or illness that are   |
|                        | not because of medical management of the disease.     |
|                        | Indirect costs include lost income and productivity.  |
| Multilateral           | Organisations formed by three or more nations to      |
| Organisation           | work on issues relevant to them.                      |

| Psychosocial Support | Support given to help meet the mental, emotional,      |
|----------------------|--|
|                      | social, and spiritual needs of people with TB and      |
|                      | their households.                                      |
| Recipient            | Individuals or households who receive the social       |
|                      | protection intervention.                               |
| Social Protection    | Social protection systems help individuals and         |
|                      | families, especially the poor and vulnerable, cope     |
|                      | with crises and shocks, find jobs, improve             |
|                      | productivity, invest in the health and education of    |
|                      | their children, and protect the aging population.      |
|                      | Social protection programs are at the heart of         |
|                      | boosting human capital for the world's most            |
|                      | vulnerable. They empower people to be healthy,         |
|                      | pursue their education, and seek opportunity to lift   |
|                      | themselves and their families out of poverty.          |
| TB Inclusive         | Interventions in which having tuberculosis is an       |
|                      | inclusion criterion for the programme but may not be   |
|                      | the only one.  |
| TB Sensitive         | Interventions that can potentially affect tuberculosis |
|                      | epidemiology and control, but it is not the primary    |
|                      | design.  |
| TB Specific          | Interventions targeted specifically at households or   |
|                      | individuals affected by TB.                            |

Unconditional Cash Direct, regular, and predictable transfers that do not

Transfer have any requirements in terms of how they are

spent or conditions to be received.
