Supplementary File 1: Correlations of trial characteristics with consistency of primary efficacy endpoint defintion between conference and publication abstracts

Trial Characteristics	Independence test[1] results	p
Late-breaker status	OR=Inf (95%CI=0.42, Inf)	0.34
Type of study	OR=0.15 (95%CI=0.01, 8.53)	0.19
Primary purpose	X^2=4.16, df=2	0.12
Study Design	X^2=0.86, df=3	0.83
Funder	X^2=5.53, df=5	0.35
Medical conference meeting	X^2=6.94, df=11	0.80
[1]Chi-square tests and Fisher's exact tests (when sample size was less than 10). Significance value was set at $p < 0.05$
