

Data Sharing Statement

Self. Renin-Angiotensin System Modulation With Synthetic Angiotensin (1-7) and Angiotensin II Type 1 Receptor-Biased Ligand in Adults With COVID-19. *JAMA*. Published April 11, 2023. doi:10.1001/jama.2023.3546

Data

Data available: Yes

Data types: Deidentified participant data, Data dictionary

How to access data: Data from this trial will be shared via the National Heart, Lung, and Blood Institute (NHLBI) BioData Catalyst, which can be accessed at:

<https://biodatacatalyst.nhlbi.nih.gov/>. Data will be available approximately 90 days after publication of the primary manuscript reporting trial results. Deidentified, patient-level data with a supporting data dictionary will be available.

When available: With publication

Supporting Documents

Document types: None

Additional Information

Who can access the data: Anyone who obtains permission via NIH at <https://biodatacatalyst.nhlbi.nih.gov/>.

Types of analyses: For any purpose that results in permission via NIH at <https://biodatacatalyst.nhlbi.nih.gov/>.

Mechanisms of data availability: Data will be available from via NIH at <https://biodatacatalyst.nhlbi.nih.gov/> for anyone who obtains permission.
