

**A****B- and T-cell lymphoma****B****B- and T-cell lymphoma****C****B-cell lymphoma****D****B-cell lymphoma**

Supplementary figure 3: (A-D) Correlation between AUC values and PIK3CD transcript expression in 41 B and T cell lymphoma cell lines exposed to IOA-244 (A) or to idelalisib (B) and in 36 B cell lymphoma cell lines exposed to IOA-244 (C) or to idelalisib (D). AUC was calculated after treatment with the drugs at increasing concentrations for 72 hours; PIK3CD RNA expression was extrapolated by RNA sequencing of each cell line at baseline conditions.  $R^2$ , Spearman correlation.
