

Supplementary Materials

Supplementary Table 1: Protocol

Study designs:	Clinical guidelines or guidance from four US-based GI professional societies: American Gastroenterological Association [AGA], American College of Gastroenterology [ACG], American Association of Liver Diseases [AASLD], and American Society of Gastrointestinal Endoscopy [ASGE])
Inclusion and exclusion criteria:	
- Patients	All individuals
- Intervention	Clinical recommendation contingent on an individual's race or ethnicity
- Comparison	None
- Setting	Outpatient or inpatient settings
- Other	Published between January 1, 2010 and September 1, 2021. Official documentation of one of the four professional societies outlined above. If there was uncertainty regarding whether a document was expired or an official society-sponsored document, a review of each professional society's website was conducted.
Data collection	A rapid review was conducted utilizing 1 reviewer (SMS).
- Databases	ECRI Guidelines Trust, PubMed
- Other sources	Professional Society websites: <ul style="list-style-type: none">- AGA: https://gastro.org/guidelines/- AASLD: https://www.aasld.org/publications/practice-guidelines- ACG: https://gi.org/guidelines/- ASGE: https://www.asge.org/home/resources/key-resources/guidelines
Data synthesis	Qualitative
Search strategy	(((((American Gastroenterological Association)) OR (American College of Gastroenterology)) OR (American Association for the study of Liver Diseases)) OR (American Society for Gastrointestinal Endoscopy)) AND (guideline[MeSH Major Topic] OR guidance[MeSH Major Topic])
